Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-12 and 17-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Zacca et al (USPN 5,308,354). Zacca discloses an atherectomy device that includes a catheter (14) with a lumen (see figure 9). There is an atherectomy element (20) at the distal end of the catheter having a shaft through the lumen. The device also includes a measurement device (tachometer). See 7:56+.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zacca in view of Valley et al (USPN 5,795,325). Zacca meets the claim limitations as described above but fails to include an output device for displaying the data from the sensor.

Valley discloses a surgical instrument that monitors a functioning of the device and provides a plurality of data to a monitor and also enables an audible alarm when the data reaches

a certain threshold. The purpose of the display and alarm are to indicator to the user the performance of the device and alert the user to potential hazards.

At the time of the invention, it would have been obvious to incorporate the display and alarm system of Valley into the invention of Zacca. Valley uses the system as a means to alert the user as to both the functioning of the device and a potential hazard to the patient. The motivation to make the incorporation would have been to enhance the safety of the device of Zacca.

Allowable Subject Matter

Claims 13 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
